

# NEWLIFE® ELITE®

5 LPM At-Home Oxygen Concentrator

## THE ONE THAT SET THE STANDARDS

Performing in the harshest of environments, this 5 LPM concentrator is simple to service with time-proven quality and reliability.

### ROBUST AND EASY TO SERVICE

The robust Elite is highly-rated for efficiency and performance in harsh environments, extreme temperatures, tropical climates, and developing countries where service capabilities are limited. It is also a perfect choice for long term care facilities. The simplistic internal design makes service and maintenance simple. These workhorse concentrators are a favorite of technicians everywhere.

### MORE OPTIONS FOR CONFIGURATION

Unique to the NewLife® series of concentrators, the Dual Flow option features two separate flow meters that can provide a total of 5 LPMs. Allowing two patients to get oxygen from one machine at the same time is an ideal solution for hospitals, long term care facilities, clinics, waiting rooms, or day and night time settings.

If multiple low flow applications are required, the Elite can be combined with the SureFlow™ flow splitting station to serve up to five patients at the same time. The Elite can also be used to power a handheld nebulizer treatment in place of a compressor with the optional air outlet.
